

BizTech VizReports 1099 Edition

BizTech VizReports 1099 Edition is a reporting tool for Infor VISUAL designed to prepare and print Federal 1099-MISC tax forms by pulling vendor payment information from the VISUAL database.

- Support for VISUAL 8 and multi-entity/multi-site databases.
- Client system requirements: Windows Client (XP, Windows 7, Windows 8, Windows 10) with a 1024 MB RAM, 50 MB free disk space (minimum)
- If using Application Server: Windows Server 2003/2008/2012 Remote Desktop Services or Citrix.
- Works with all Versions of VISUAL 5.2.2 and later
- The application will prompt for setup with SQLBase, SQL Server or Oracle database platforms. User security credentials are required.
- Extracts data from the VISUAL database into Access tables.
- Designed to print on IRS 1099-MISC laser printer forms. Tested on OMB No. 1545-0115
- Microsoft Access or the Microsoft Access Runtime must be installed to use this reporting tool.
- Software is delivered via download link with complete instructions.

ONLY \$199.00 per company!*

*VISUAL 7.0.0 and earlier is \$199.00 *per company name*. VISUAL 7.1.x and 8.x is \$199.00 *per site ID*

Features

Exception Reports

Use these reports to find possible errors in the setup of vendor records within the current vendor maintenance table. For example, show any 1099 vendors with a blank tax ID.

Vendor Listing Report

This report simply prints all vendors marked as 1099 vendors in a report format, showing the amount paid for the year. This report can be used to review the information before printing the forms.

Review, Edit and Add Information

The vendor payment data is presented in a table to allow you to review, edit and add 1099 information before printing. This option allows you to adjust amounts or add new vendor records if your information for VISUAL is not complete.

Add Information for All Boxes

This feature includes a place to type in values for boxes 1-18 on the 1099 forms for each vendor. This allows you to specify the amounts that should be considered rents, royalties, medical and health care payments, etc.

1099 Forms

This is the report used to print the standard 1099-MISC forms. 2-part Federal tax forms are supported. All the fields are set up to print on the laser forms. Print the same report 3 times to get Copy A, Copy B and Copy C ready for filing.

1096 Form

This feature prints the 1096 Summary form to summarize your 1099-MISC forms.
