

SIMSWITCH FEATURES

SimSwitch gives resellers a whole new level of access to mobile services including full control of voice, text and data traffic, mobile numbers, porting and SIM branding. The service integrates fully with **CallSwitch**, our core product offering, at network level, granting the end user a truly converged communication suite. With **SimSwitch** we control the voice, text, and data traffic on our network for you to terminate however you please. Perfect for value-added mobile services such as call recording and PBX convergence. Never before has such a complete level of mobile service been available to traditional CPs and ITSPs with such a low barrier to entry.

4G
