

Break Out Box

B.O.B can be used with a headset as a replacement to the staff unit (speaker and microphone), or as an additional option to the staff unit.

It is particularly useful in environments where background noise is affecting the staff member's ability to hear their customer. It helps to reduce background noise by negating the need for a staff loudspeaker.

It is also useful in compact spaces that do not allow for a unit to be placed on the desk or counter, as the unit can be mounted to any flat surface.

Physical Data

Dimensions	Height - 20mm (0.79") Width - 117.6mm (4.63") Depth - 39mm (1.54")
Weight	100g (0.22lbs)
