We at Heritage Cooperative would like to thank BizTech for their great work in performing a Network Security Assessment/Audit for Heritage Cooperative. The Audit was very informative. It always helps to see how secure our business network is from the outside.

The Assessment Report has been shared with our Senior Staff, as well as the Board of Directors, and they were quite impressed. We appreciate the recommendations, and have already made the suggested changes to make our Network more secure.

I am very pleased with BizTech's performance in every aspect of this testing.
