

ARE YOU READY FOR IATF?

We have established a dedicated department to assist manufacturers implement Quality Management Systems (QMS).

The department is led by Ewald Meier, who understands that QMS opens doors for clients to procure contracts and new work.

As an entity funded by the Eastern Cape Provincial government to grow the competitiveness of Eastern Cape manufacturers, we provide world-class services, advice and shopfloor interventions to clients at a highly subsidised rate.

Not only is QMS - and levels of certification - a mandatory requirement for the auto and other sectors, it improves customer satisfaction, decision making efficiency, builds credibility, drives efficiency and cost savings and engages the workforce in a process of continuous improvement.

As a certified training provider, if any of the following statements are applicable to your business then we can most certainly assist you:

"My business does not have any quality principles or systems in place"

"My business adheres to industry quality principles but does not have a formal quality system in place"

"My business is ISO 9001 certified but would like to upgrade to IATF 16949 "

For more information on our QMS programme, contact Ewald Meier now:
