ENGINEERING PARADISE, ONE CONFERENCE AT A TIME !

International speaker, author & futurist

How can we address the social and economic impact of artificial intelligence?

I'll give your audience the answers they are looking for. It makes no sense to react to an unpredictable future that changes at an exponential rate. We must have a plan.

I'll lay it all out for attendees using one of three possible formulas, in English or French (customization possible):

- ❖ Short talk (15 minutes)
- ❖ Keynote (45 minutes)
- ❖ Workshop (2 hours)

I'll even give each audience member a **FREE book**, entitled, *“Engineering Paradise: Are You Ready?”*

Why me?

I focus on modern fact and science-based solutions.

I will inspire your audience and give them real hope for the future by giving them real practical tools they can use in their professional and personal lives.

Are You Ready?
