The goal of a TireVigil™ Cloud trial evaluation (the “TRIAL”) is to provide a fleet with an opportunity to experience the capabilities of TireVigil in its own operation to determine whether it can benefit by using this technology. This TRIAL process identifies the phases and duration of the TRIAL along with TireStamp’s and your fleet’s participation roles. In addition, you may establish goals that will be agreed to and included within the trial structure so that all your questions are answered and documented along with the TireVigil Cloud Trial results.

TRIAL Timelines

PRE-START PHASE (approx. 10 days) (TRIAL Set-up)

- Document fleet TRIAL objectives
- Complete fleet and vehicle TRIAL profiles
- Complete TPMS 2.0 training
- Install test vehicles with TireVigil TPMS 2.0 and finalize TRIAL vehicle settings
- Establish responsibility for TRIAL tasks and set the official TRIAL start date

PHASE I – VISIBILITY (30 days) (Understanding how TireVigil works)

- Your fleet acquires familiarization and operational experience with the TireVigil Cloud (Alerts, Reports and TireWatch Servicing APP)
- TireStamp will provide a Phase I Report – A summary of the TRIAL results to date including an analysis of Phase I Trial objectives

PHASE II – ACCOUNTABILITY (30 days) (Effective use of TireVigil)

- Ensures that your fleet is getting the most out of the TireVigil™ Cloud
- Introduction of the **TireVigil Cloud Maintenance Dashboard**
- Involvement of Maintenance, Operations, Safety and General Management in the TRIAL and its results
- TireStamp will provide recommendations for tire maintenance improvements if any
- TireStamp will provide a Phase II Report – A summary of the TRIAL results to date including an analysis of Phase II objectives

PHASE III – SAVINGS (30 days) (Determining TireVigil’s Return on Investment)

- TireStamp will analyze data and provide a summary of the TRIAL findings, actual ROI to date, projected savings to your fleet based on full deployment of TireVigil, and introduction to the **TireVigil Cloud Savings Dashboard**
- TireStamp will provide a Phase III Report - An overall analysis of the TRIAL results and its performance in meeting TRIAL objectives
- Next steps

Upon completion of the TRIAL you will have an additional 90 days for your fleet to decide whether to begin deployment of TireVigil with no additional monitoring costs.

Our **TireVigil™ Cloud** connects your fleet’s vehicles to the cloud and provides the visibility you need to prioritize and schedule service for tire problems as they develop, 24/7 and to eliminate enroute tire-related breakdowns, reduce labor costs, improve fuel economy, streamline tire maintenance operations, optimize tread wear and casing life, and improve safety.
